Ordering Cabinet Doors & Drawer Fronts

Doors and drawer fronts are available in many styles and in popular species of material. Please visit the doors section of our web site for more information. While there are many details to consider when placing an order, the drawings below represent a common situation. Visit our showroom to view samples and learn more.

Two views of a cabinet are shown below, one with the cabinet doors and drawer fronts and one without. To measure for new doors and drawer fronts, measure THE OPENINGS that will be covered by the new doors and drawer fronts. One inch is added to each dimension by the manufacturer, so that the new product will cover the openings plus one-half inch on all four sides.

The form below is filled out correctly to order doors and drawer fronts for the cabinet shown. The column labeled S/P/DF refers to single door, pair of doors, or drawer front. Note that while opening D and E seem to be a pair, there is a vertical cabinet member between them, and they are considered single doors. Opening C has two doors in a single opening, and is a pair. Openings A and B are for drawers.
